

November 10, 2017

Week 11, Class #35

Software Release

Mark Seaman

MWF – 10:00-11:30 - Kepner 0095F

This Week – Dev Ops

✧ Monday, 11-6

- Lecture – Web Hosting

✧ Wednesday, 11-8

- Lecture – Server Admin

✧ Friday, 11-10

- Lecture – Maintenance

Last Week

Test

Dev Ops

Next Week

Risk Management

Building Images

- ✧ Operating System
- ✧ SSH Keys
- ✧ Frameworks and Languages
- ✧ Database
- ✧ File system volumes
- ✧ Domain and networking
- ✧ Encryption
- ✧ Application Software

Virtualization

- ✧ Virtual server infrastructure - VMWare, VirtualBox
- ✧ Machine Images - Operation System (encapsulated computer disk)
- ✧ Virtual Private Servers - Cloud hosting environment
- ✧ Popular Services
 - <https://amazonlightsail.com>
 - <https://digitalocean.com>

Release Cycle

✧ Cost of Deployment

- Create data center solution
- Final Acceptance Testing
- Rollout

How often should you release?

✧ Time to release drives the schedule

- From Idea to Go Live
- Schedule compression
- Aggressive Release reveals issues

Release Cycle

✧ HP circa 1997

- 5 engineers and 3 testers for one year
- Requirements & Design - 3 months
- Code - 6 months
- Test - 3 months
- \$1-2 Million

✧ Shrinking World Solutions - 2017

- 1000 hours (start to release)
- \$100,000
- limit the project scope
- Incremental and automated

Deploy Code

From test bench to datacenter

Single line of code

Deploy Code

From test bench to datacenter

Single line of code

✧ `ssh mybookonline.org git pull`

See you Monday

Servers, Images, and Hosting

✧ History of Software Deployment

- 1977 - Data Centers
- 1987 - PC
- 1997 - Internet
- 2007 - Web services
- 2017 - Mobile devices

Modern Deployment

- ✧ From Closet to Cloud
- ✧ Cheap Hosting \$10/month
- ✧ Open Source software
- ✧ Continuous integration
- ✧ Automated tools
- ✧ Frequent updates
- ✧ Virtual Servers

Steps to Deploy an App

- ✧ Decide on hosting service
- ✧ Create a server image
- ✧ Create a software application
- ✧ Register and route domain
- ✧ Configure server environment
- ✧ Build automation scripts and policies
